

HyGEARS © TM 5.0 Demo

This Demo version of HyGEARS has limitations imposed in order to ensure you get a proper experience.

The Demo version is intended solely to demonstrate some of the features of HyGEARS.

Since using HyGEARS effectively requires Training, the following have been omitted from the Demo version:

- gear sets can be created; however, you are not allowed to change the input parameters;
- gear sets cannot be saved nor read from disk;
- gear sets can be developed/edited, but none of the changes are kept;
- specific 5Axis machines cannot be created, edited or deleted;
- no output of any sort can be saved to disk, to the exception of the Summary, in which a Banner identifies that the output originated from the Demo version.
